Mathematics

Any student requiring a mathematics course before enrolling in a calculus, statistics or computer science course should note the following if you have not taken the Mathematics Placement Test and have not taken the prerequisite for the course you need, take the Mathematics Placement Test before enrolling in mathematical science courses. Make sure you know which courses are recommended for your major. Both the Department of Mathematics and Applied Mathematics and your adviser can help you with the possible choices.

For those preparing for, and not placing into, calculus (MATH 200), MATH 151 Precalculus Mathematics is the appropriate prerequisite course. For those preparing for, and not placing into, statistics (STAT 208 or STAT 210), MATH 131 or MATH 141 is recommended as a prerequisite course, though any higher numbered MATH course will serve as well; it is important that you satisfy any additional mathematics requirements of your department as well as preparing for your statistics course. (For more information about the Mathematics Placement Test or college requirements, please visit http://www.math.gmu.edu/

The noncredit MATH 001 Elementary Algebra course is available only during the summer session, and will not be offered for fall 2005. However, for students who have taken the placement test and placed into MATH 001, we offer special sections of MATH 131 and MATH 141 in which you may enroll with permission. For permission to enroll in one of these special classes, please go to the Math Lab in Olver PH, Room 3013 (until May 10), or contact Academic Advising (after June 15).

Section 012 of MATH 200 is restricted to biology or mathematics majors and will focus on applications related to the life sciences.

Statistics
Students requiring statistics courses for their majors should check with their departments/advisers regarding which courses are appropriate. Some departments require STAT 210, some require STAT 238 and some recommend (but do not require) one or the other. Note that the prerequisite for either course is a satisfactory score on the Mathematics Placement Test or completion of MATH 131 or a higher level math course. Transfer students can demonstrate accepted transfer credit for a college algebra (or higher level) course as a prerequisite. Students may not receive credit toward graduation for both STAT 208 and STAT 210.
