# VCU Life Sciences

The Center for the Study of Biological Complexity within VCU Life Sciences invites students with interests in biology or the health sciences, chemistry, computer science or math, and an aptitude for blending studies of molecular biology and computer science, to join VCU's bioinformatics program. We offer an undergraduate bioinformatics major leading to a Bachelor of Science degree and a choice of master's programs, including a traditional thesis degree and nontraditional professional master's, as well as an accelerated B.S.-master's program. Each program offers flexibility, with three bioinformatics specialization tracks — biology/genomics, computational science or quantitative/statistics. Students can find descriptions of the bioinformatics programs on the CSBC Web site at <http://www.vcu.edu/csbc/education.html>.

Full course descriptions can be found online using the VCU course database at <http://www.pubinfo.vcu.edu/vcucourses>. Additional courses will be opened during the 2005-06 school year.
